EDUCATION

Western Washington University

Bellingham, WA

Bachelor of Science in Computer Science

Expected Graduation June 2026

Relevant Coursework: Operating Systems, Object Oriented Design, Data Structures, Database Systems, Analysis of Algorithms, Computer Networks, Robotics, Web Development

TECHNICAL SKILLS

Languages: Java, C/C++, Python, SQL (MySQL), JavaScript, HTML/CSS, PowerShell, VBScript, Matlab, Racket, x86 Assembly

Frameworks & Platforms: React, Node.js, Express, Tailwind CSS, MongoDB, Java Swing

Developer Tools & Environments: Git, Linux/Unix Environment, Windows VM Labs, OpenStack Horizon

Libraries: Pandas, NumPy, Matplotlib, libc, PyCryptodome, pywin32, Tk

PROJECTS

Under The Cup | *MongoDB, Express, React, Node.js, Tailwind CSS*

March 2026 - June 2026

- Built a MERN stack social application for browsing species pages, writing bug reviews, saving posts, and managing user profiles.
- Implemented a Vite + React frontend with Tailwind CSS and routed pages for authentication, search, posting, profiles, saved content, and species exploration.
- Developed a Node.js and Express backend structure for API routing and MongoDB-backed application data.

Ransomware Learning Environment | *Python, Windows, PowerShell*

September 2025 - June 2026

- Completed an educational Windows VM lab that safely simulates ransomware-style staging, persistence, scoped encryption, ransom messaging, and recovery.
- Implemented scavenger-hunt flags tied to registry Run keys, Group Policy startup scripts, Startup folder helpers, scheduled tasks, and Windows services.
- Used Python cryptography tooling, PyCryptodome RSA key wrapping, pywin32/winreg, PowerShell, and VBScript loaders to teach malware analysis and incident response concepts.

Deadwood | *Java*

January 2025 - April 2025

- Developed a complete board game, from the core OOP engine to the interactive Swing GUI.
- Designed a MVC framework to swap a text-based UI for a Swing GUI with zero core logic refactoring.
- Engineered a modular Swing GUI with static and non-static components to solve complex UI interaction issues.

MyShell | *C*

October 2024

- Wrote a custom MicroShell from scratch in C to understand and control the fundamental interactions between a user, the OS, and system memory.
- Implemented proprietary versions of core Unix commands (cd, env, ls, cp, rm) through direct system calls for process and file system interaction.
- Engineered internal command logic to manage child process execution and ensure correct modification of the shell's runtime environment.

EXPERIENCE

Server and Team Trainer

June 2021 – Sept 2023

Mizu Japanese Steakhouse

Gig Harbor, WA

- Cross-trained and mastered all FOH roles (server, busser, host), providing flexible team support whenever needed.
- Meticulously managed complex, multi-course orders for parties of 8-20, ensuring complete accuracy on all modifications and allergy requirements.
- Trained new server hires on POS system operation, table management, and customer service standards.
